ver. 1. 0. 1

Product Name	Copper Liquid Cold Plate
Model number	HS-C140-300 (P86-127) × 2-M6
Inquiry phone number	Osaka CMB Sales office +81-6-6532-1301
Kawaso Texcel Corporation	

Weight: about 5.8kg

## **Specifications**

- \*There are processing marks on the cooling surface.
- ※In order to ensure heat sink performance, surface flatness and parallelism of the product is set to 0.02 mm or less.
- \*\*Commercial bolts (JIS B 0209-1 fitting classification: middle) pass through the threaded section.
- \*\*There is a step (about 0.5 to 1.0 mm) at the joint between the body and the cover.
- However, the cover does not go outward from the body.
- $\times$ Performed matt Ni plating (2  $\mu$ m) on the whole as base plating.
- When machining inside the tapped holes, inside the holes may be non-plated.

## Handling Precautions

- \*\*Pure water or antifreeze containing corrosion inhibitor is recommended for coolant.
- \*\*Even when pure water is used, it is recommended to install an ion exchange unit to prevent ion concentration increase in circulating water.
- \*\*Because city water and industrial water may corrode copper, please refrain from using.
- \*When attaching the tube to the fitting connection, please fix it with a tool so that no force is applied to the joint between the fitting connection and copper.
- \*Please note that dimensions and specifications may be changed without prior notice.
